

Quiz 2: Multiplication and Matrices

You will have 2-3 minutes to answer this on your own on your sheet (numbers 4 and 5). Then your team will have 5-6 minutes to answer them as a team (numbers 104 and 105).

Your individual grade, out of ten points, includes .5 points for each correctly bubbled/unbubbled circle (minimum score is 1pt for being here).

4. Morally, zero times a matrix is zero. But to write this in a way that we can prove it, we need to write it formally. Suppose $m \neq n$ are positive integers, $0 \in \mathbb{R}$, $A \in M_{m \times n}$, $Z \in M_{m \times n}$ (the zeros matrix). Bubble in the option for every true statement.

- (a) $0A = 0$
- (b) $0A = Z$
- (c) $ZA = Z$
- (d) $AZ = Z$
- (e) None are true.

5. Same as before, but now $m = n$.

- (a) $0A = 0$
- (b) $0A = Z$
- (c) $ZA = Z$
- (d) $AZ = Z$
- (e) None are true.
